This map displays 2012 high-resolution orthophotography for the Town of Wolcott. It is a natural color, leaf-off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, 12 foot street names, streets, railroads, and utility crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, transit stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through partnerships between Connecticut Department of Emergency Services and Public Protection (DESP), the Connecticut Department of Transportation (CDOT), and the National Aeronautics and Space Administration (NASA), along with the United States Geological Survey (USGS) providing support through project management, contracting and quality assurance/quality control (QA/QC).

BASE MAP DATA: Based on data compiled from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1981 and 1989. It includes political boundaries, roads, airports, geographical names, and geographic places. Streets and street names are from the 1989 USGS "copyrighted" data. These map images are in another current use complete.
