EXPLANATION

This map displays 2012 high resolution orthophotography for the State of Connecticut. It is a natural color, leaf off, 1 foot (0.3 m) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, US routes, state routes, streets, railways, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, town stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOTOGRAPHY: Aerial imagery is provided through partnerships between Connecticut Department of Emergency Services and Public Protection (DESPP), the Connecticut Department of Transportation (CDOT), and the National Geospatial Intelligence Agency (NGA) along with the United States Geological Survey (USGS) providing support through project management, contracting and quality assurance/guarantee control (QA/QC).

BASE MAP DATA: Based on data acquired from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, geographic names and geographic places. Streets and town names are from 1992 Atlas© copyrighted data. Base map information is neither current nor complete.

MAP USAGE GUIDELINES: Use the CT EDRS website for this map and a variety of others on PDF format. Visit the CT EDRS website to download the free map digital special data shown on this map.
