2012 Color Infrared Orthophoto
Leaf-Off
Brookfield, CT

EXPLANATION
This map displays 2012 high resolution infrared orthophotography for the town of Connecticut. It is a color infrared, leaf off, 1 foot (30-meter) aerial survey taken in the Spring of 2012. This aerial orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification, damage, and recovery analysis. The location and shape of features in other_DTM features will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Structural data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are digitized but may not match the locations or features on the orthophotography. Also shown are airports, hospitals, boundaries, important geographic locations and landmarks are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection, Office of the Fire Marshal, and the Connecticut Department of Emergency Management and Homeland Security. The imagery was collected by a private contractor and digitized and processed by a commercial vendor. The imagery has been georectified and is accurate to within 1 foot (30 meters).
