2012 Color Infrared Orthophoto
Leaf-Off
Branford, CT
(East)

EXPLANATION
This map displays 2012 high resolution infrared orthophotography for the City of Connecticut. It is a color infrared, leaf off, 1 foot (0.3 meter) aerial survey taken in the Spring of 2012. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification of mapping and planning applications. The locations and shape of features in other GIS layers may not match the locations of such features on the infrared orthophotography. Also shown on airports, hospitals, utilities, school districts, and more. Locations important geographic locations and boundaries are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Aerial imagery is provided through a partnership between Connecticut Department of Emergency Management and Homeland Security (DEMHS), the Connecticut Department of Energy and Environmental Protection (DEEP), and the Federal Department of Agriculture (USDA-FSA). Imagery is reproduced with permission of the developer, Planet Labs Inc.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1945 and 1989. 1996-2007 base data was produced by the National Hydrography Dataset (NHD) and the National Elevation Dataset (NED). 2009-2012 base data was produced by the NED and the National Land Cover Dataset (NLCD). DEM was derived from the 2009-2012 National Elevation Dataset (NED). Map is not colorfast. Products from right and information.
