EXPLANATION

This map displays 2012 high resolution infrared orthophotography for the State of Connecticut. It is a color infrared, leaf off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas.

DATA SOURCES

ORTHOPHOTOGRAPHY - Aerial imagery is provided through a partnership between Connecticut Department of Emergency Management and Homeland Security (CT DEMHS) and the Connecticut Department of Energy and Environmental Protection (DEEP), on the NatGeoPhotoScape(TM) platform, supported through project management, contracting and quality assurance/quality control (QA/QC).

BASE MAP DATA - Based on data originally from the 7.5 minute USGS quad maps published under Title 25 Code of Federal Regulations Part 270, “Publication and Use of Topographic Maps.” These data are protected by US copyright law. All rights reserved. You may not reproduce or republish these data in any format without written permission from the United States Geological Survey.
