EXPLANATION

This map displays 2012 high resolution infrared orthophotography for the State of Connecticut. It is a color infrared, leaf off, 1 foot (30-meter) aerial survey taken in the Spring of 2012. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification of mapping and mapping. The location and shape of features in other GIS layers are not exactly match the locations of such features on the orthophotography. Also shown are airports, hospitals, schools, post offices, and other boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Aerial imagery is provided through a partnership between Connecticut Department of Energy and Environmental Protection, Office of Planning and Development (DEEP), the Connecticut Department of Transportation (CDOT), and the National Geospatial Intelligence Agency (NGA) along with the United States Geological Survey (USGS) providing support through project management, consulting and quality assurance/quality control (QA/QC).

BASE MAP DATA - Based on data originally from 1:24,000-1:62,500 USGS 7.5 minute topographic quadrangle maps published since 1950 and 1971, NIMA profiles, and the 1959 National Topographic Series 1:24,000 quadrangle maps. Some maps are published as seniors and geographic computer files. Streets and roads are show as a thin black line.

MAPS AND DIGITAL DATA - Visit the CT DEP website for base map and a variety of others to PDF format. Visit the CT DEP website to download the base map digital spatial data shown on the map.
