This map displays 2012 high resolution infrared orthophotography for the town of Groton. It is a color infrared, leaf off, 1 foot (30-meter) aerial survey taken in the Spring of 2012. This infrared orthophotography provides many services, such as obtaining tree and vegetation conditions as well as supporting flood and water management. The exact location of features in other ORMS will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Structured areas such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not be updated for new data. Important geographic locations and boundaries are labeled. The town of Groton is located in eastern Connecticut near the New London, Waterford, East Lyme, and Lyme towns. Map prepared by CT DEEP February 2013.
