Q3 Flood Zone Data
Killingworth, CT

Legend
- 100 Year Flood Zone
- 100 Year Flood Zone, COBRA
- 500 Year Flood Zone
- 500 Year Flood Zone, COBRA
- Floodway in Zone AE
- Other Flood Areas

Explanation
The Q3 Flood Data are derived from Flood Insurance Rate Maps (FIRMs). They offer floodplain management, mitigation and provide insurance information for the National Flood Insurance Program (NFIP). 100 Year Flood Zones indicate that there is 1 out of 100 chances that the area will be flooded every year. While 500 Year Flood Zones indicate that there is 1 out of 500 chances that the area will be flooded every year. NOTE: The Q3 Flood Zone Data is the best flood zone mapping data available statewide. However, it is dated and may not represent current flood zone mapping. It is available for all towns except Windham. More accurate flood zone mapping data may be available for this town from FEMA. Refer to the National Flood Hazard Layer (NFHL) Database, which supercedes the Q3 Flood Data. The NFHL Database is not available for every county.

Data Sources
Q3 FLOOD DATA: Provided by the Federal Emergency Management Agency (FEMA).

BASE MAP DATA: Based on data originally from 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries and important geographic places and names. Streets and street names are from Yale Maps copyrighted data. Base map information is neither current nor complete.

MAPS AND DIGITAL DATA: Visit the CT ECO website for this map and a variety of others. Visit the NRCS soils website for the soils data shown on this map. Visit the CT DEP website to download the base map digital spatial data shown on this map.

This page contains a Q3 Flood Zone data map for Killingworth, CT. The map shows flood zones with 100 and 500 year flood risks, floodways, and other flood areas. The data is derived from FEMA's National Flood Insurance Program (NFIP) and is based on data from 1969 to 1992. The map is useful for floodplain management, insurance, and planning purposes. The map includes streets and street names from Tele Atlas and 1992 sources, along with political boundaries and important geographic features. Additional sources for the map include the National Flood Hazard Layer (NFHL) Database. The map is not colorfast and is intended for use in conjunction with other data sources. The map is prepared by the Connecticut Department of Environmental Protection (CT DEP) and is based on the State Plane Coordinate System of 1983, Zone 3526 and North American Datum of 1983.
