BASE MAP DATA - Based on data originally from 1:24,000-scale CFR title 7, part 657. It identifies the location and extent of farmland, land that is defined as prime farmland, land that is defined as moderately important farmland, and land that is defined as locally important farmland. This map identifies land that is defined as prime farmland, land that is defined as moderately important farmland, and land that is defined as locally important farmland. The map also includes a legend that explains the data sources, explanation, and data sources.

EXPLANATION

This map provides information on farmland, wetlands, and waterbodies. The farmland is divided into three categories: prime farmland, moderately important farmland, and locally important farmland. The map includes a legend that explains the data sources, explanation, and data sources.

DATA SOURCES

The map includes data from the U.S. Department of Agriculture, Natural Resources Conservation Service (NRCS). The data sources include aerial photographs, satellite imagery, and field surveys. The map is prepared by the Connecticut Department of Environmental Protection (CT DEP). The map is intended to provide a comprehensive view of the farmland, wetlands, and waterbodies in the study area.
