HYDRIC SOILS
EAST HADDAM, CONNECTICUT

LEGEND

- Hydric soils are those that occur under a natural wetland or are associated with wetlands.
- Wetland soils are those that are sufficiently wet to support the growth and reproduction of wetland plants.
- Soil Score: 1 indicates a high degree of wetness; 2 indicates a moderate degree of wetness; 3 indicates a low degree of wetness.

HYDRIC SOILS

- Often these areas are urban land complexes or other areas that are frequently flooded.

EXAMPLE:

- Halsey silt loam, cold
- Fluvaquents: Udifluvents complex, frequently flooded
