SOIL PARENT MATERIAL
ORANGE, CONNECTICUT

LEGEND

- Parent soil
- Urban Influenced
- Mapped in Bedrock
- Enlargement of this map beyond the Soil Survey Geographic Database (SSURGO) database produced parent material to help interpret soil boundaries and project vertical boundaries of the geologic material

EXPLANATION

Soil parent materials are shown by color and symbol, indicating the material type and degree of its influence. The map shows the relationship between the soil and underlying geologic material. Urban Influenced areas are shown in gray, indicating areas where the soil has been modified by human activity.

DATA SOURCES

- USGS 7.5' quadrangle topographic maps
- Connecticut Geological Survey (CGS) maps
- Connecticut Department of Public Works (DPW) maps
- New York State Department of Transportation (NYSDOT) maps

The map is a composite of various data sources and is intended to provide a high-level overview of the soil parent materials. The map is subject to errors and omissions and should not be used for precise location of specific soil types or for other purposes that require high levels of accuracy. For more detailed information, consult the original data sources.
