POTENTIAL FOR SUBSURFACE SEWAGE DISPOSAL

HEBRON, CONNECTICUT

LEGEND

High Potential: These soils have characteristics that can be met by a properly designed subsurface disposal system. The user of this map should contact the NRCS for site-specific information.

Medium Potential: These soils have characteristics that, with some modifications, can be met by a properly designed subsurface disposal system. The user of this map should contact the NRCS for site-specific information.

Low Potential: These soils have characteristics that require special precautions for proper system design and cannot be used without a site-specific evaluation by an NRCS soils scientist or equivalent.

Very Low Potential: These soils have characteristics that can only be used with extreme caution or only under certain conditions. The user of this map should contact the NRCS for site-specific information.

EXPLANATION

This map of potential for subsurface sewage disposal in Hebron, Connecticut, is based on an analysis of soil characteristics and their relationship to groundwater recharge. The map is intended for use in planning and designing subsurface disposal systems, but it should not be used as the sole basis for system design. The user of this map should contact the NRCS for site-specific information.

HOW TO USE THIS MAP

The information on this map is intended to be used as a guide for planning and designing subsurface disposal systems. The user of this map should consult with the NRCS for site-specific information.

DATA SOURCES

The information on this map is based on data collected by the NRCS, the U.S. Geological Survey, and other federal, state, and local agencies. The map is updated periodically to reflect new information.

ACKNOWLEDGMENTS

The NRCS acknowledges the contributions of the following organizations in the development of this map:

- U.S. Geological Survey
- Connecticut Department of Environmental Protection
- Other state and local agencies

This map is intended to be used as a guide for planning and designing subsurface disposal systems. The user of this map should consult with the NRCS for site-specific information.
