AQUIFER PROTECTION AREAS
Bristol, CONNECTICUT

LEGEND
- Level A Aquifer Protection Area (Final Adopted)
- Level B Aquifer Protection Area (Proposed)

EXPLANATION
The Aquifer Protection Programs, administered by the Connecticut Department of Energy & Environmental Protection (DEEP) and the Rhode Island Department of Environmental Management (RI DEM), identify areas surrounding public water supply wells that require protection from activities that could contaminate the aquifer. The programs identify two types of protection areas: Level A and Level B. Level A areas are more restrictive and require water companies to complete both preliminary and final mapping. Level B areas are less restrictive and require only preliminary mapping.

AQUIFER PROTECTION AREA MAPS: The map shows the locations of Level A and Level B Aquifer Protection Areas. The maps are based on the most recent data available and are subject to change as new information becomes available.

DATA SOURCES
- Aquifer Protection Area Data: The maps are based on the Aquifer Protection Area digital dataset which contains the most recent information on Level A and Level B Aquifer Protection Areas.
- Massachusetts Wellhead Protection Areas: The map shows the locations of the Massachusetts Wellhead Protection Areas, which are identified on the Massachusetts Environmental Protection Agency (MDEP) website.

ACQUISITION:
- This map is intended to be used as an educational tool and is not intended for legal purposes.
- The information in this map is subject to change as new data becomes available.

LEGAL DISCLAIMER:
- The information in this map is for educational purposes only and is not intended for legal purposes.
- The information in this map is subject to change as new data becomes available.
