EXPLANATION

The Aquifer Protection Program, administered by the Connecticut Department of Energy & Environmental Protection, provides for the protection of groundwater resources. The program is intended to be used to depict the physical characteristics of the groundwater aquifers and aquifer-fracture zones within the State of Connecticut. The program includes the designation of areas where groundwater protection is needed and the establishment of standards and regulations for the protection of these areas.

This information is intended to be used in the development of the Aquifer Protection Program. The program provides for the protection of groundwater resources and is designed to ensure that groundwater is protected from contamination and degradation.

DATA SOURCES
