consistent with 1:24,000 scale topography and based on detailed modeling of the groundwater flow system. The area contributing groundwater to the well field is shown.

Preliminary Aquifer Protection Areas are shown in blue. The area designated as the B Aquifer Protection Area (Preliminary) is shown in red. The data used to develop the preliminary and final Aquifer Protection Areas on the map were obtained from RIGIS. The information was published by the Connecticut Department of Energy and Environmental Protection and is available from their website for more information on the Aquifer Protection Areas.

The map shows the extent of the Aquifer Protection Areas within the study area. The map is at a scale of 1:24,000 (1 inch = 2000 feet) when printed at original size. The map includes a legend with symbols indicating the areas designated as Aquifer Protection Areas. The map is a useful tool for understanding the groundwater flow system and the areas that are regulated for groundwater protection.
