AQUIFER PROTECTION AREAS
Thompson, CONNECTICUT

EXPLANATION

The Aquifer Protection Program, administered by the Connecticut Department of Energy & Environmental Protection (DEEP) and the municipalities, is the statewide effort to protect the quality, quantity, and replenishment of Connecticut’s water resources. The Aquifer Protection Program has three goals: (1) to protect the quality, quantity, and replenishment of the state’s aquifers; (2) to protect the public health and safety of the state’s residents and visitors with respect to ground water contamination; and (3) to protect the environment and ecosystem with respect to ground water contamination.

DATA SOURCES

AQUIFER PROTECTION AREA DATA - Aquifer Protection Areas are delineated in part on the basis of publicly available information, and in part on the basis of information available from the USGS, Connecticut Geological Survey, and the State of New York. This data is from the State of New York.

STATE OF CONNECTICUT - This data is from the State of Connecticut.
