NATURAL DRAINAGE BASINS
MAJOR, REGIONAL, SUBREGIONAL AND LOCAL
GROTON, CONNECTICUT

LEGEND

Scale 1:24,000 (1 inch = 2000 feet) when map is printed at original size (48 x 36 in)

DATA SOURCES

MAP SELECTION DATA - The drainage basin selection data for the map was compiled from various sources including the Connecticut Geological and Natural History Survey, U.S. Geological Survey, and the U.S. Army Corps of Engineers.

PREDICTION MODELS - The prediction models used to estimate the natural drainage basins were based on historical climate data and topographical features.

EXPLANATION

This map shows the natural drainage basins in the Groton area. The basins are classified into major, regional, subregional, and local categories. The map includes a legend that explains the symbols used to represent different basin types.

The drainage basins are shown in red, while the coastal direction is shown in blue. The map also includes contour lines to indicate elevation changes and valleys of noticeable relief. River and stream features and watershed delineations are also shown on the map.

RELATED INFORMATION

BASE MAP DATA - Based on data originally from 1:24,000-scale base maps, the digital spatial data shown on this map can be downloaded from the website.
