The map shows the drainage and subdrainage system of the major, regional, subregional, and local drainage basins in the town of Montville, Connecticut. The map is intended to be printed at its original dimensions in order to maintain the accuracy of the data. The map replaces a similar natural drainage basin map and a variety of others in PDF format. Visit the CT DEP web site for resources on drainage and water quality.

Please see the explanatory notes at the end of this map for additional information about the map's limitations and features.

DATA SOURCES
MAP: NATURAL DRAINAGE BASINS. The drainage and subdrainage basin maps of the state of Connecticut are compiled from the 1:24,000-scale U.S. Geological Survey quadrangle and other data sources, including aerial photography, stream gaging, and other information available to the Connecticut Department of Environmental Protection. The map is intended to be printed at its original dimensions in order to maintain the accuracy of the data.
