The map shows the major and subregional extent of drainage basins for the State of Connecticut. Drainage basins in Connecticut are divided into major, subregional, and local drainage basins. The major drainage basins are further divided into subregional drainage basins. Each drainage basin is represented by a unique shape, color, and designation. The map includes a legend that explains the symbols used to represent different types of drainage basins. The map is based on a Digital Elevation Model (DEM) surface and hydrography data. The DEM was based on the ELEVATION CONTOUR DATA from the USGS between 1969 and 1984. The map is printed at a scale of 1:24,000 (1 inch = 2000 feet) when map is printed at original size (48 x 36 in). The map includes various features such as roads, parks, and other natural and man-made features. The map is intended to provide a comprehensive view of the drainage basins and their relationship to the surrounding environment.

DATA SOURCES:
- Drainage basins: USGS topographic quadrangle maps at 1:24,000 scale
- Hydrography: 2000 collection of ground elevation LiDAR data
- Roads, parks, and other features: Available from the DOT and DEM

EXPLANATION:
- Drainage basins are represented by unique shapes, colors, and designations.
- Major drainage basins are further divided into subregional drainage basins.
- The map includes a legend that explains the symbols used to represent different types of drainage basins.
- The map is based on a Digital Elevation Model (DEM) surface and hydrography data.
- The DEM was based on the ELEVATION CONTOUR DATA from the USGS between 1969 and 1984.
- The map is printed at a scale of 1:24,000 (1 inch = 2000 feet) when map is printed at original size (48 x 36 in).
- The map includes various features such as roads, parks, and other natural and man-made features.
- The map is intended to provide a comprehensive view of the drainage basins and their relationship to the surrounding environment.

NATURAL DRAINAGE BASINS
MAJOR, REGIONAL, SUBREGIONAL AND LOCAL
SALEM, CONNECTICUT

LEGEND
- Drainage Basins
- Major Areas
- Subregional Areas
- Local Areas
- Drainage Basins:
  - Major Drainage Basins
  - Subregional Drainage Basins
  - Local Drainage Basins

OUTLET DIRECTION
- Outlet Direction:
  - Major Drainage Basins
  - Subregional Drainage Basins
  - Local Drainage Basins
- Coastal Direction

HORIZON:
- 0-5 feet contour
- 5-10 feet contour
- 10-20 feet contour

Figure 1: Example showing a graphical drawing from another subregional and local drainage basin in part of the map.
