The map shows the location of drainage basins in Woodstock, Connecticut. The basins are color-coded according to their hierarchical level: major, regional, subregional, and local. The legend explains the color codes and symbols used on the map.

EXPLANATION

The data sources used for this map include contour lines from USGS 1:24,000-scale topographic maps. These contour lines are used to depict drainage basins and elevations every 20 feet with a horizontal accuracy of approximately 3 feet.

DATA SOURCES

- USGS 1:24,000-Scale Topographic Maps
- Contour Line Data: Elevation every 20 feet with a horizontal accuracy of 3 feet
- Map Scale: 1:24,000 (1 inch = 2000 feet) when printed at original size (48 x 36 in)
