These two datasets were developed by CT DEP and depict major, regional and subregional basin numbers for local basin. Figure 1. Example showing a typical local drainage basin and the subregional, regional, and major drainage basin it is part of.

- 4000 - 8000 ft

EXPLANATION

This map shows the stream and delineation points of a regional soil and water basin. Local basins are delineated as one continuous unit of land. Boundaries are not affected by state, county, or local government boundaries. This map is intended to be printed at its original dimensions in order to maintain the 1:24,000 scale (1 inch = 2000 feet).

The map includes all political boundaries, railroads, airports, highways, county boundaries, and local area geographic features such as towns, cities, parks, schools, and hospitals. The map includes the map coordinates for the State Plane Coordinate System of 1983, Zone 3526, which is used for the map's reference point. The map was created by CT DEP and is not colorfast.

DATA SOURCES

The map data includes information from a variety of sources, including the Connecticut Department of Environmental Protection, the Connecticut Geological Survey, the U.S. Geological Survey, and the United States Census Bureau. The map was produced using ESRI ArcGIS software and printed using a high-quality printer and paper to ensure clarity and accuracy.

The map is intended to be used for educational and informational purposes and is not intended for legal or regulatory purposes. The map is subject to change and updates may be made periodically. The map is not intended for navigational purposes and should not be used for that purpose.

Acknowledgments

The authors would like to thank the Connecticut Department of Environmental Protection for providing the data used in the creation of this map. The map was produced by the Connecticut Department of Environmental Protection and printed by CLEAR, a partnership between the University of Connecticut College of Agriculture and Natural Resources and the Connecticut Department of Environmental Protection.
