This map shows the names and identification numbers of major, regional, subregional, and local drainage basins in Connecticut. The major basin numbers identify the regional drainage basin, and the first seven digits are numbered sequentially beginning upstream and proceeding downstream. The first two digits indicate the subregional drainage basin. The last three digits are local basin numbers. The names and numbers are shown on this map are the same as those published on the 1:125,000-scale Connecticut Natural Drainage Basins Map, 1983, and the state map of Natural Drainage Basins in Connecticut, 1981. The map is intended to be printed at its original dimensions in order to show drainage basins and to be compared with the state map of Natural Drainage Basins in Connecticut, 1981. The names and numbers are shown on this map do not represent vegetation or climate regions. The map is not colorfast.
