NATURAL DRAINAGE BASINS
MAJOR, REGIONAL, SUBREGIONAL AND LOCAL
EAST HARTFORD, CONNECTICUT

EXPLANATION
This map shows the drainage and hydrologic units of the Town of East Hartford, Connecticut. The map is based on a digital dataset that identifies the major, regional, subregional, and local drainage basins within the town. The major basin is the largest unit and is delineated by the primary outlet of the river. The regional basins are smaller units that are delineated by the secondary outlets of the river. The subregional basins are even smaller units that are delineated by the tributaries of the river. The local basins are the smallest units and are delineated by the smaller tributaries of the river.

DATA SOURCES
The data used to create this map were obtained from the following sources:
- United States Geological Survey (USGS)
- Connecticut Department of Environmental Protection (CT DEEP)
- Connecticut Agricultural and Natural Resources (UConn)

ELEVATION
The elevation data used to create this map were obtained from the United States Geological Survey (USGS). The elevation colors indicate the elevation range of each basin.

DATA SOURCES
The data used to create this map were obtained from the following sources:
