  ◇ 10-5 m

EXPLANATION

This map shows the drainage area boundaries, outlet direction, and elevation information for the local drainage basins in the East Windsor region. The map is at a 1:24,000-scale and includes political boundaries, railroads, airports, and major drainage features.

The local drainage basin areas shown on this map represent general direction of surface water flow within local basin boundary type and identification numbers. Arrows on the map indicate the direction of flow from the outlet to the main stem drainage of the basin.

Elevations are indicated on the map to provide a general understanding of the topography within the drainage basins. The map is a valuable tool for understanding the local drainage system and can be used for planning and development purposes.

DATA SOURCES

The data sources used to create this map include topographic quadrangle maps, political boundaries, and drainage basin information. These datasets were prepared by the Connecticut Department of Energy and Environmental Protection (CT DEP) and depict major, regional, and subregional drainage basins.

The datasets were developed by CT DEP and depict major, regional, and subregional drainage basins. It is intended to provide a comprehensive view of the local drainage basins in the East Windsor region.

Visit the CT DEP website for this and other datasets in PDF format. Visit the CT ECO website for this and other datasets in PDF format.
