This map shows the natural and developed areas of Connecticut. It was created using a variety of data sources including aerial photography, topographic maps, and digital elevation models. The map includes roads, rivers, streams, and lakes, and is intended to be printed at its original dimensions in order to maintain the 1:24,000 scale (1 inch = 2000 feet).

**DATA SOURCES**
- USGS 7.5’ topographic maps
- Connecticut Department of Energy and Environmental Protection (CT DEP)
- Connecticut River Basin Commission
- Connecticut Sea Grant
- University of Connecticut

**EXPLANATION**
- The map includes the natural drainage basins of Connecticut, which are delineated by interpreting the 10 foot contour lines and hydrography.
- Drainage basin boundaries are shown on the map only where they are represented by 10 foot contour lines or by other tied boundaries.
- The drainage basin boundaries are shown on the map only where they are represented by 10 foot contour lines or by other tied boundaries.
- The map shows the location and identification number of major, regional, and subregional basins.

**RELATED INFORMATION**
- Drainage Basin Areas of Connecticut, Nosal, 1977, CT DEP Water Resources Division
- This map is intended to be printed at its original dimensions in order to maintain the 1:24,000 scale (1 inch = 2000 feet).

**LEGEND**
- Basin Boundary
  - Major Basin
  - Subregional Basin
  - Local Basin
- Local Drainage Basin Direction
  - Outlet Direction
  - Main Stem Direction
- Coastal Drainage
- Elevation
  - High - 250 FT
  - Low - 1 FT
