locate the project boundaries and any additional affected areas for impacts on state listed species and the need for a full environmental impact statement. Use the CTECO Interactive Map Viewers at www.ct.gov/deep/nddbrequest

This map depicts general locations of state and federal data sources and the need for a full environmental impact statement. Use the CTECO Interactive Map Viewers at www.ct.gov/deep/nddbrequest

DATA SOURCES

1:24,000-scale USGS 7.5 minute topographic quadrangle maps available from www.topo.gov or from participating USGS state mapping agencies. Geospatial data were processed into state or national coverages as available. Identical data were also used for federally listed species. Geospatial data for state- and county-listed species were obtained from state Natural Resource Management Agencies (NRMA) and GIS databases. Most detailed maps are available at www.deer.org and on the CTECO website (www.ct.gov/deep/nddbrequest).

EXPLANATION

This map depicts general locations of state and federal data sources and the need for a full environmental impact statement. Use the CTECO Interactive Map Viewers at www.ct.gov/deep/nddbrequest

STATE MAP DATA - Based on data originally from the US Fish and Wildlife Service, National Biological Survey (NBS) . Environmental Impact Statement Studies 

SHORELINE MAP DATA - The boundary data used for the shoreline and water body lines were obtained from the state GIS database. For full environmental impact statement. Use the CTECO Interactive Map Viewers at www.ct.gov/deep/nddbrequest

WATER AND DRAINAGE DATA - The water and drainage data were obtained from the state GIS database. For full environmental impact statement. Use the CTECO Interactive Map Viewers at www.ct.gov/deep/nddbrequest

RELIASTED MAP QUESTION

The map is complete to be printed at its original size and printed at a 1:24,000-scale ratio. For full environmental impact statement. Use the CTECO Interactive Map Viewers at www.ct.gov/deep/nddbrequest
