This map depicts known locations of state and federal listed species and critical habitats. The map is intended to be used as a pre-screening tool to determine the potential for impacts on state listed species and the need for a Natural Diversity Data Base review. To use the map, locate the project boundaries and any additional affected areas on the map. If the project is within a shaded area there may be a potential conflict with a listed species or natural resource. For more information, please visit the following https://files.dep.state.pa.gov/DEEPportal/submit_a_request_for_natural_diversity_data_base_state_listed_species_review_or_site_assessment. More detailed instructions are available along with the request form on the Department of Energy and Environmental Protection (DEEP) webpage, <https://portal.ct.gov/deep/nddbrequest>.

Date of Map: June 2025

NDDB Information - Locations of state and federal listed species and critical habitats are based on data collected by the Connecticut Department of Energy & Environmental Protection, private conservation groups and the scientific community and compiled by the Natural Diversity Database (NDDB). The information is not necessarily the result of comprehensive or site-specific field investigations; in some cases locations have been derived from literature or museum searches or historic records, and may not be well-differentiated to most generalizations of locations. The exact species or community location falls somewhere within the shaded area and not necessarily in the center. Information on this map does not include Natural Area Preserves, designated wetland areas or wildlife concentration areas.
