This map depicts general locations of state and federal listed species and the land that they are associated with. Exact species information has been buffered to produce generalized location data. The land areas depicted do not necessarily have a listed species on the map. If the property's wildlife is listed on the Species List, it is depicted on the map. This map is intended to provide a general location for listed species and should not be used for site-specific research or land management. Contact the Department of Energy and Environmental Protection (DEEP) for more specific location information.
