Natural Diversity Data Base Areas
Glastonbury, CT

Legend
- State and Federal Listed Species
- Critical Habitat
- State Boundary
- County Boundary
- Town Boundary
- interstate
- Toll Route
- State Route
- Ramp
- Street
- Ferry
- Railroad
- Water Outcrops
- Intermittent Watercourse
- Snow
- Drainage Catchment
- Dam
- Stream
- Designed Channel
- Water
- Intermittent Water
- Flats
- Rocks
- Inundated Area
- Marsh
- Cranberry Bog
- Manholes
- Tube
- Intermittent Water
- Pipe
- Seawall
- Seawall
- Sewage Pond
- Waste Tank

Explanation
This map depicts potential locations of rare and isolated natural areas of Connecticut. It is intended for use by natural resource managers and the public for planning projects that may impact these areas or the species that occur within them. Use of this map does not replace permits or legal requirements for protecting these areas. The map is not drawn to scale and may not represent accurate distances or areas. The map is not intended for legal or land use decisions. Species are ranked according to their status: Threatened, Endangered, and Rare. All species ranked as rare are protected by state law. Use the CTDENR Interactive Map Viewer at www.cteco.uconn.edu for more information on the status of species and the species that occur in these areas.

Data Sources
- The map was created using data from the Connecticut Department of Energy and Environmental Protection, Bureau of Natural Resources.
- Vegetation data from the Connecticut Deer Management Assistance Program.
- Stream and wetland data from the Connecticut Nutrient Management Program.
- Species data from the Connecticut Department of Energy and Environmental Protection, Bureau of Natural Resources.
- Topographic data from the U.S. Geological Survey.

Data Source Acknowledgements
- Connecticut Department of Energy and Environmental Protection, Bureau of Natural Resources, Wildlife Division
