This map depicts the locations of state and federal listed rare and endangered species and critical habitats in the area. The data used for this map is from the Natural Diversity Database (NDB) and was compiled from various sources including literature, museum searches, and historic records. The data is intended for use by state and federal agencies, and the public. The map is not intended for use in legal or court proceedings.

The map includes the locations of state and federal listed species, critical habitats, political boundaries, railroads, airports, hydrography, and water resources. The map is intended to be used by the general public to identify the locations of rare and endangered species and critical habitats. The map is not intended for use in legal or court proceedings.

DATA SOURCES

The map is based on data from the Natural Diversity Database (NDB), which is a comprehensive database of rare and endangered species and critical habitats in the United States. The data is compiled from various sources including literature, museum searches, and historic records.

For more information about the Natural Diversity Database, visit the DEEP website (www.cteco.uconn.edu).
