The Connecticut Department of Energy & Environmental Protection has developed a Natural Diversity Data Base Areas (NDDB) for the state of Connecticut. The NDDB is a digital database that contains information about various natural diversity data base areas within the state. The NDDB is used for the protection and management of natural resources, including wildlife habitats, plant communities, and other natural areas of scientific, cultural, and aesthetic significance.

**Data Sources**

- NDDB: Natural Diversity Data Base Areas

**Legend**

- State and Federal Listed Species
- Critical Habitat
- State Boundary
- County Boundary
- Town Boundary
- Intersate
- U.S. Route
- State Route
- Ramp
- Street
- Ferry
- Railroad
- Watercourse
- Intermittent Watercourse
- Stream
- Drainage Ditch
- Dam
- Dugout Channel
- Marsh
- Water
- Intermittent Water
- Ponds
- Rocks
- Inundated Area
- Shrub
- Cranberry Bog
- Marsh
- Dam
- Fish Hatchery
- Aquaduct
- Sewage Pond
- Water Tank

**Explaination**

This map shows the locations of natural diversity data base areas in the state of Connecticut. The map is based on data collected from various sources, including field surveys, aerial photography, and other data. The map is intended to help protect and manage natural resources and ecosystems within the state.

**Use of the Map**

- Inquiries: Contact the Connecticut Department of Energy & Environmental Protection
- Contact Information: 100 Washington Street, Hartford, CT 06106
- Phone: 203-262-3800
- Email: deep.nddb.request@ct.gov

**Data Availability**

- Data for the entire state of Connecticut is available for download at the following website: [Connecticut Department of Energy & Environmental Protection](http://cteco.uconn.edu)

**Date of Map**

- June 2021

**Prepare for Use**

- Use this map for educational purposes only. It is not intended for use in assessments or for general reference.

**Acknowledgments**

- The creation of this map was supported by a grant from the U.S. Environmental Protection Agency.

**Disclaimer**

- The accuracy of the map is not guaranteed. Users should verify the information before relying on it for decisions or activities.
