DATA SOURCES

This map depicts point locations of state and federal listed species, critical habitats, and areas listed for Federal Protection. Though this map has been prepared to depict the locations of species and habitats, it is not a substitute for the published information and cannot be used to enforce any regulatory actions. The map has been prepared for educational and informational purposes only. This map does not depict species occurrence or habitat locations as interpreted from the species occurrence databases available online.

DEER MAP DATA - Based on data collected from the DEER annual deer harvest survey conducted by the State Department of Energy and Environmental Protection, Bureau of Biological Services. The DEER habitat layer is derived from the annual harvest data and other available data. This map is intended for educational and informational use only.

SNAP AND ESRI DATA - View the CT ESRI technology license agreement for more information on the use of these data. View the ESRI software terms of agreement for more information on the use of these data.
