locations. The exact species or community location falls under investigations; in some cases locations have been derived from comprehensive or site-specific field studies. Data has been compiled from the Natural Diversity Data Base (NDDB). The information is not necessarily the most current or complete. The map is intended to be printed at its original dimensions in order to maintain the 1:24,000 scale (1 inch = 2000 feet).

DATA SOURCES

This map depicts geographic boundaries of areas and habitat conditions as a result of comprehensive field studies and information from the Natural Diversity Data Base (NDDB). The information is not necessarily the most current or complete. The map is intended to be printed at its original dimensions in order to maintain the 1:24,000 scale (1 inch = 2000 feet).

SPECIES LOCATION DATA - See the Connecticut Department of Energy & Environmental Protection (DEEP) Natural Diversity Data Base for the most current and complete information. The project is within a shaded area on the map. If the project is within a shaded area on the map, it is prohibited under state law to conduct activities that may impact the listed species or critical habitats. The map is intended to be printed at its original dimensions in order to maintain the 1:24,000 scale (1 inch = 2000 feet).
