This map depicts general locations of state and federal listed species and critical habitat areas. For more information about State Listed Species, contact the CT ECO website (www.cteco.uconn.edu) for this map and a variety of other data about biodiversity. This map is intended to be printed at its original 1:24,000-scale USGS 7.5 minute topographic quadrangle scale. For more information about data sources, contact the Natural Diversity Data Base review. To use the map, street names are from Tele Atlas copyrighted data. Base map information is neither current nor complete. Map is not colorfast to water.

The map is created to be printed at its original 1:24,000-scale USGS 7.5 minute topographic quadrangle scale. For more information about data sources, contact the Natural Diversity Data Base review. To use the map, street names are from Tele Atlas copyrighted data. Base map information is neither current nor complete. Map is not colorfast to water.

DATA SOURCES

- **NED Map Data**: Based on data obtained from NED, National Elevation Dataset. This is a collaborative effort of Federal, State, and local partners to create an orthoimage of the United States. The NED data is a high-resolution digital elevation model (DEM) of the earth's surface. This map is intended to be printed at its original 1:24,000-scale USGS 7.5 minute topographic quadrangle scale. For more information about data sources, contact the Natural Diversity Data Base review. To use the map, street names are from Tele Atlas copyrighted data. Base map information is neither current nor complete. Map is not colorfast to water.

- **SRF AND DEMAL Data**: Use the CT ECO website (www.cteco.uconn.edu) for this map and a variety of other data about biodiversity. This map is intended to be printed at its original 1:24,000-scale USGS 7.5 minute topographic quadrangle scale. For more information about data sources, contact the Natural Diversity Data Base review. To use the map, street names are from Tele Atlas copyrighted data. Base map information is neither current nor complete. Map is not colorfast to water.
