This map depicts potential locations of rare and federal listed species, critical habitats, and other important areas within the Salisbury area. The Natural Diversity Data Base (NDDB) contains information on state and federal listed species and critical habitats. The map is intended to be used as a pre-screening tool to determine the potential impacts on state listed species and the need for a Natural Diversity Data Base review. To use the map for impacts on state listed species and the need for a Natural Diversity Data Base review, the map should be used with the required maps and information. More detailed instructions are available at www.cteco.uconn.edu. For more information about State Listed Species, contact the DEEP, Bureau of Natural Resources, Wildlife Division at email: deep.nddbrequest@ct.gov.
