Exact locations have been buffered to produce generalized investigations; in some cases locations have been derived and Environmental Protection (DEEP) webpage. Species Review form (DEP-APP-007) and submit to the locate the project boundaries and any additional affected be used as a pre-screening tool to determine the potential this map.

LEGEND

- State and Federal Listed Species
- Critical Habitat
- State Boundary
- Town Boundary
- Interstate
- U.S. Boundary
- State Route
- Ramp
- Street
- Ferry
- Railroad
- Watercourse
- Intermittent Watercourse
- Shore
- Drainage Ditch
- Aqueduct
- Intermittent Water
- Water
- Intermittent Water
- Rocks
- Bluffs
- Barrens
- Cranberry Bog
- Dam
- Fish Hatchery
- Aqueduct
- Sewage Pond
- Water Tank

EXPLANATION

This map shows general locations of rare and natural features within the Natural Diversity Data Base (NDE) areas. It includes the locations of rare and natural features, such as the locations of rare and natural features, such as species, habitats, and ecosystems. The map is designed to help identify the locations of rare and natural features and to provide a general understanding of their distribution.

DATA SOURCES

- NDE map data: Based on data originally from the National Ecological Observatory Network (NEON) and other federal and state agencies, such as the U.S. Fish and Wildlife Service, the U.S. Department of Agriculture, and the U.S. Geological Survey. The NDE is a collaborative effort to collect, manage, and disseminate data on the nation's natural diversity.
