Protection, private conservation groups and the scientific natural community. For more information complete a Natural Diversity Data Base review. To use the map, This map depicts general locations of state and federal...

**DATA SOURCES**

Territorial boundaries are extracted from natural resources data sets and maintained in a Geographic Information System (GIS). The boundaries are drawn from the Connecticut Department of Energy & Environmental Protection data set for the 3000ft buffer of the Connecticut River, which includes the shoreline features. The map is based on the Natural Diversity Data Base (NDB) data set, which is maintained by the Connecticut Department of Energy & Environmental Protection. The NDB data set contains information on natural diversity data in Connecticut, including species, habitats, and ecosystems. This map is intended for informational purposes and should not be used for regulatory or legal purposes. For more information, please visit the Connecticut Department of Energy & Environmental Protection website.
